Aston Fields Middle School

EVENT/ACTIVITY NAME

Robotics Day

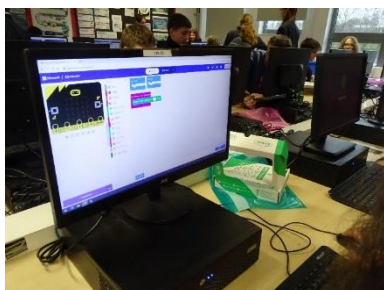

WRITE UP

Pupils from the local schools were invited to a robotics event at South Bromsgrove High School to build and program a Microbit Robot. They were given a set of challenges throughout the day including obstacle courses and a robotic dance show. Pupils were split into small teams and competed against each other to win each event. These ranged from assembling the robot, coding, testing and debugging and correcting any errors in the program when anything went wrong.

This opportunity also supported the pupil's interests and desires for a potential career within the industry of Information Technology and Programming. It also inspired our pupils to develop these skills further in their own time.

It was a fun event which all the pupils enjoyed and would love to participate in again.

Aston Fields Middle School were the overall winners of the three events!
